

Amendment and Response and Examiner Interview Summary

Applicant: Michael R. Krause et al.

Serial No.: 09/578,155

Filed: May 23, 2000

Docket No.: 10991833-1

Title: RELIABLE DATAGRAM

IN THE SPECIFICATION

The paragraph on page 10 starting at line 10 should be replaced with the following amended paragraph:

The reliable datagram service implemented with a SDR, such as SDR 102, provides for distributed AI communication using one-to-one, one-to-many, or many-to-one AI relationships and is connectionless from the perspective of the AIs. In addition, AIs can operate within the same device via a device backplane fabric (e.g., a form of shared memory within a device) or between disparate devices which are connected via an intermediate communication fabric. Therefore, the communications between AIs is independent of the physical locality of the AIs.
